All training classes are free for FlashPoints Customers. Times may vary, please check signup sheet.

Signup to request an invitation to a class at:

[www.flash-soft.com/training.php](http://www.flash-soft.com/training.php)

## ZOOM into 5.1 !

Version 5.1.0.0 of FlashPoints has finally arrived. There are several new features like notifiers (horn strobe, horn, and bell) and a bunch of new enhancements that are designed to make FlashPoints easier to use and create professional drawings quickly.

We are also happy to report that we recently acquired a website address to match our catchphrase for FlashPoints, "CAD, Your Way". The Flash-Soft website can now be accessed using [www.cadyourway.com](http://www.cadyourway.com).

Until next time...

Denis & Ray

**ENHANCE your FlashPoints experience  
with FlashPoints Survey!**

**Available in the FlashPoints Store**

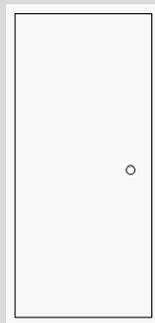

The current version of FlashPoints is:

**Version 5.1.0.0**

**Run FlashPoints to update it today!**

(if you are unable to update to Version 5.1.0.0, please call  
Flash-Soft Support right away for assistance.)

## The Doors

**The 2 door buttons are  
now 1**

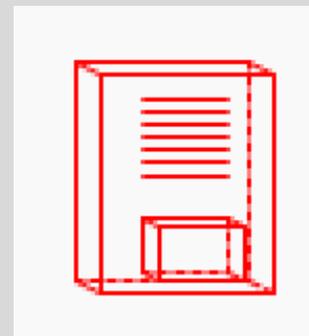

For years there have been 2 door buttons in FlashPoints with the only difference being the position of the door knob.

Now there is one button. The two doors are still in FlashPoints, but can be chosen from the dropdown list at the top of the canvas.

**Say Hello to the NOTIFIER button**

Removing one of the door buttons allowed us to create a new button. The Notifier button.

Use the Notifier button to add horn strobes, horns, and bells to your drawings. Now FlashPoints really does have all the "bells" and whistles!

## No more Squinting at Pictures

### Zoom feature added

Adding your own specification sheets to FlashPoints can be a tricky business because FlashPoints has always resized the displayed images to small thumbnails. Not anymore!

Simply mouse over a specification sheet or a photo sent from FlashPoints Survey and the mousepointer will turn into a magnifier. Click the image and it will zoom out to full screen so it can be seen in its entirety. This even works when adding a New Item to your specification sheet library, to make it easier to see if you are choosing the correct image.

## Join the Conversation!

Our new Facebook group is just the place to meet with other FlashPoints users, share tips and secrets, and find out what other people are doing with FlashPoints.

The name of the group is

**Fire System Drawing with FlashPoints.**

Sign in today and join the fun!

As always, FlashPoints is  
CAD, Your Way!

# FlashPoints Enterprise Discount Program

Companies with 5 or more copies of FlashPoints are eligible to join the FlashPoints Enterprise Discount Program. Contact Flash-Soft to see how your company can take advantage of these money and time saving perks, designed just for larger enterprises.

If you are a branch office of an Enterprise customer, contact your IT help desk to get in on the fun and start using FlashPoints. To see a list of FlashPoints Enterprise Customers, visit the FlashPoints New Customer Order Form at: [www.flash-soft.com/fpstore/newcust.php](http://www.flash-soft.com/fpstore/newcust.php)
